DocBrain

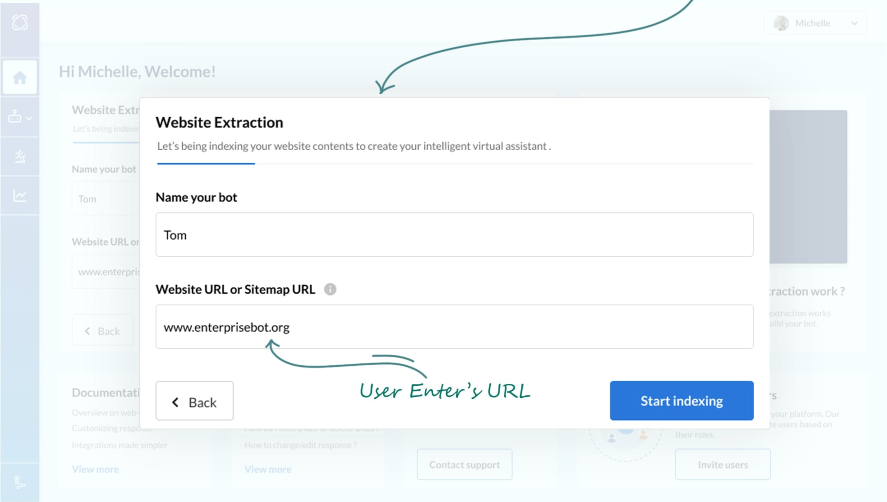
Get your AI-powered chat assistant up and running within 24hrs.

To make it simpler, we've shown the entire process that the User must go through in order to utilise the DocBrain platform.

The steps highlighted below are followed after the 'User' logs in to the DocBrain platform

Step 1 : Entering the website URL

After logging into the DocBrain platform, the user begins the process of Bot creation by entering in their website URL.



Michelle
Hi Michelle, Welcome!
User Enter's URL

Website Extraction

Let's being indexing your website contents to create your intelligent virtual assistant .

Name your bot

Tom

Website URL or Sitemap URL

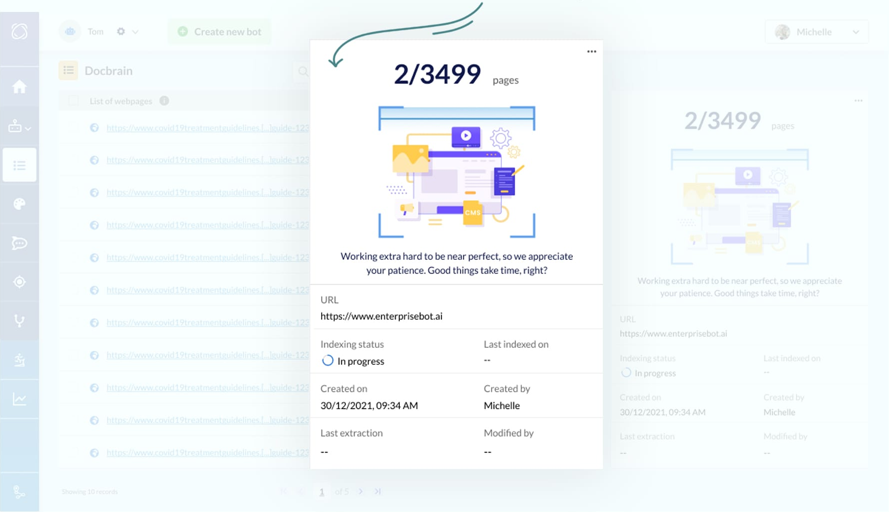
www.enterprisebot.org

Back
Start indexing

After entering the website URL, the user needs to just wait.

Step 2 : Waiting for data extraction

The AI-parser then begins to crawl through the various web pages to create a repository of conversational data. This may take up to 24hrs (1 Day).



Extraction begins
